\* Vaccination records sent with these codes will be rejected if indicated as administered before or after certain dates (see below) and if indicated that the vaccination was provided by the sending organization (code 00, submitted in delimited field 34 or RXA-9 in an HL7 file/message). If not indicated as provided by the sending organization, the record will be considered historical.

**FLSHOTS vaccine type availability dates:**

Note: Some dates are approximations or placeholders where the vaccine is known to not have been available but the exact date is unknown. 10/28/16 was the date of a major update to FLSHOTS where many new vaccine types were added for use. Of these new types, many represent vaccine that has not been available for some time and the installation date of 10/28/16 was used to prevent accidental usage for current documentation.
