

## Important Information

### 2022-2023 Influenza Vaccine Shipment Update

Dear VFC Providers,

Influenza vaccines are arriving at the CDC distribution center and are being shipped to providers who completed the seasonal pre-book in FL SHOTS. Providers were only able to pre-book the number of 0.5mL doses they needed. The specific brand of vaccine that is shipped is determined by what is available at the CDC distribution center. The following pediatric vaccines will be available this year:

Brand	Manufacturer	NDC	Presentation	Indication
FluLaval-Quad	GSK	19515-0808-52	10 pack 0.5mL single dose syringe	6 months +
Fluarix-Quad	GSK	58160-0890-52	10 pack 0.5mL single dose syringe	6 months +
FluMist-Quad	AstraZeneca	66019-0309-10	10 pack 0.2mL single dose sprayer	2-49 years
Fluzone-Quad	Sanofi	49281-0422-50	10 pack 0.5mL single dose syringe	6 months +
Flucelvax-Quad	Seqirus	70461-0322-03	10 pack 0.5mL single dose syringe	6 months +

**Please Note:** Pre-book is now closed. If you did not pre-book, you may contact the VFC Program at [FloridaVFC@flhealth.gov](mailto:FloridaVFC@flhealth.gov) to request doses be placed in pre-book for you. Please include your VFC PIN. Flu vaccine orders will not be available for ordering in Florida SHOTS, but the order status can be tracked on your Order Requests page.

The VFC Program will continue to ship providers up to 50% of their pre-book request as the vaccine becomes available. Once all providers have received half of their pre-book flu vaccines, the remaining vaccine doses should be requested through Florida SHOTS by using the Order Requests page. At that time, those providers who did not pre-book may request flu vaccines.

# Florida Vaccines for Children (VFC) Program

Contact the VFC Program via email at [FloridaVFC@flhealth.gov](mailto:FloridaVFC@flhealth.gov) or via phone at 1-877-888-7468, option 1, Monday through Friday, 8:00am to 5:00pm, Eastern time.

General VFC Program information and forms can be found on our website at <http://www.floridahealth.gov/programs-and-services/immunization/vaccines-for-children/index.html>.

## Tip of the Day

**Did you know that the Atlantic hurricane season is typically busiest from August to early October? Some of the most powerful and destructive hurricanes have occurred during this time. Make sure that your Emergency Plans include where your vaccines will be stored if they need to be moved out of harm's way.**
