1. Adding Information About Your VFC Vaccine Storage Units Into Florida Shots	2
2. Adding And Updating Calibration Certificates	4
3. Uploading Temperature Files Into Florida Shots	10
4. Temperature Log	14
5. Excursion Incident List	15

1. ADDING INFORMATION ABOUT YOUR VFC VACCINE STORAGE UNITS INTO FLORIDA SHOTS

This guide helps Vaccines for Children (VFC) sites to enter and manage temperature logs within Florida SHOTS. Uploading VFC vaccine temperatures from a continuous temperature monitoring device is a requirement.

- 1. Log into Florida SHOTS.
- Click "Temperature Logs" under "Vaccine Inventory." If you do not see this menu item and you need these permissions, please contact the primary or secondary VFC contact in your office to enable this function. If you are unsure who these individuals are, please contact the VFC Program office at 877-888-7468 and choose option 1.

Adding Your VFC Vaccine Storage Units

Once you click "**Temperature Logs**," the system will bring you to the "**Refrigerators/Freezers List**" where you will first need to add your VFC vaccine storage units. Select your site's "**VFC Provider PIN**" and enter the unit information under Refrigerator/Freezer section.

Refriger	ators / Freezers List 📀					Training Environ	ment
VFC Provider:	* Pin:501042 BEACH PEDS Pin:501043 BEACH PEDS WEST Pin:501044 SUNSET PEDS]					
	PIN/EID Identifier	R/F	End	ded Date Si	now out-of-service units		
			No	o records are on file for the selectio	n criteria.		
F Refrigerator	/Freezer						
		Pin/VFC EID:					
		Identifier: *					
		Type: * F	Refrigerator 🗸				
		Manufacturer: *					
		Model: *					
		Import Format:	- Select	✓ (from currently in use California)	alibration record)		
	i	Temperature Entry Blocked As of:					
		Service Dates From: *	Thru:				
Add							Cancel

- Identifier Create and enter a unique name for the storage unit. For sites that have multiple
 refrigerators and/or freezers, you must differentiate the identifier between the units in Florida SHOTS.
 To help distinguish between units, each "Identifier" should include the following: VFC PIN number,
 a dash, and the word "refrigerator or freezer." In this example, if your site's PIN number is 456789,
 for your site's second refrigerator, you would use "456789–Refrigerator2" as the "Identifier." You will
 need to make sure that the identifier you create on this page matches the identifier input into your
 logging device (such as the Log Tag TRED30-7R) which identifies the storage unit being measured.
- Type Select the correct button to indicate whether the unit is the refrigerator or a freezer. Make sure you select accurately so that the system doesn't incorrectly interpret temperature variances. (Allowable temperatures for a refrigerator are significantly higher than temperatures for a freezer.)
- Manufacturer Fill in the refrigerator or freezer's manufacturer.
- Model—Fill in the refrigerator or freezer's model number.
- Import Format—This field must be set by the VFC Program office once they have validated your data logging device. Once this field is set by the VFC office, you are able to import your temperature file into Florida SHOTS.
- Service Dates—You must enter a "From" date to show the initial date of service for this unit within
 Florida SHOTS. Put in today's date, as this might be the first date you will record a temperature for this
 unit within the registry. You will not enter a "Thru" date unless you determine that the refrigerator or
 freezer will no longer be used to store VFC vaccine.

Once you have all of the information filled in for your refrigerator or freezer, click "Add" to save this unit to the PIN selected at the top.

2. ADDING AND UPDATING CALIBRATION CERTIFICATES

After clicking "**Add**," you will see a green alert at the top of the page stating that the unit was successfully added. You will see the PIN/EID along with the identifier, and you will see the menu on the right side where you can update temperature and information for the unit. You can click "**Show Detail**" to populate what was entered for the unit for the PIN and make changes or enter a "Thru" date when the unit has to be taken out of service.

Adding Calibration Certificates

The VFC Program and Florida SHOTS need to know that your VFC vaccine storage unit has a valid, calibrated thermometer, so it is required to enter calibration certificates for both your primary and backup continuous temperature monitoring devices.

NOTE: You will need the calibration certificate to add the information into the system.

1. To add the calibration information for your temperature monitoring device, click "Add Calibration."

Instrument Pass/Fail testing, or In Tolerance Measurement results for the device: *	
Maximum characters permitted is: 8000. Character count: 0 Documented Uncertainty. Measurement results indicate unit passed test and the document of (0.5C). Statement that calibration testing conforms to ISO 17025	ented uncertainty is within suitable limits (recommended uncertainty = +/-
٨٨٨	Dotum to Defrineratore/Ereazore List
AUU	Neturn to Nettigerators/Freezers List

Enter the following information from your thermometer's calibration certificate: "Manufacturer/Name," "Model Nbr" (number), "Serial Nbr" (number), and "Expiration Date."

To update the "Import Format," contact the VFC Helpdesk at (877) 888-7468 option 1.

If this calibration is for the thermometer that is currently being used for your storage unit, then check "**Is Current for the unit**." If it the calibration you are entering is for a backup thermometer, then leave it unchecked. When it comes time for thermometer (backup) to be used, simply go into your calibration log and check that thermometer is "**Current for the unit**."

Adding a Certificate of Calibration from an Accredited Laboratory

If you have a certificate of calibration from an accredited laboratory (A2LA, ACLASS, IAS, L-A-B, NVLAP or PJLA), you will click the check box that says, "**Certificate is from an accredited laboratory**" and then select the lab from the drop-down menu. Click "**Calibration Report Examples**" at the top of the screen for extra help completing the form.

Click "Add." A green message will appear at the top of the page to indicate that you have successfully added the calibration. You will need to add a new calibration any time the current calibration certificate for your thermometer expires.

Adding a Certificate of Calibration that Is Not from an Accredited Laboratory

If your calibration is not from an accredited laboratory, you must enter the measurement results in the box labeled "**Measurement results for the device**," and check the boxes for the following items:

- "Instrument Pass/Fail testing, or In Tolerance"
- "Documented Uncertainty"
- "Statement that Calibration Testing Conforms to ISO 17025"

NOTE: All of the information you need to complete these items is shown on your thermometer's certificate.

		Go to Order List for Pin:501042	
Add		Return to Refrigerators/Freezers List	Cancel

Click "**Add**." A green message will appear at the top of the page to indicate that you have successfully added the calibration. You will need to add a new calibration any time the current calibration certificate for your thermometer expires.

Switching Data Logger

If your primary continuous temperature monitoring device is malfunctioning or is being recalibrated, you will need to use your backup device. It is required to enter calibration certificates for both thermometers, and setting up the import file format for your backup thermometer will enable you to upload temperature files without any disruptions or calls to the VFC program. You will simply switch devices within Florida SHOTS.

1. To the right of your unit, click "**Calibration Log**" to see the details for your current and backup thermometers.

3. UPLOADING TEMPERATURE FILES INTO FLORIDA SHOTS

Uploading Temperature Files into Florida SHOTS

At least once every seven days, temperature files must be uploaded into Florida SHOTS.

If you do not add temperatures in seven business days for any unit your site has placed within Florida SHOTS as storing VFC vaccine, you will see a red "(Readings Overdue)" when you click "**Temperature Logs**" under "**Vaccine Inventory**."

PIN/EID	Identifier	R/F	Ended Date	□Show out-of-service units

4. TEMPERATURE LOG

Temperature Log

You can view your uploaded temperatures in your Temperature Log. You will be able to see a list of all of the temperatures within the system, organized by date. Click on the date within the log to see the specific temperatures you uploaded for that unit on that date. Florida SHOTS will default to a seven-day range. You are able to change the dates by inputting different dates and clicking **"Get Matching Readings**." You also can click the option to **"Show only readings with excursions**."

PIN/EID	Identifier	R/F	Ended Date	Show out-of-service units	
P:501042	501042-REFRIGERATOR	R			Upload Temperatures File
				Show Detail	Add Missing Temp Reading
				Show Detail	Temperature Log
				Excursion Incident List	Excursion Incident List
				Go to Order List for Phil.501042	Add Calibration
					Calibration Log

In the "**Temperature Log**" list you can see when the reading was taken, the current temperature, the minimum and maximum temperature ranges, the average temperature for that day, as well as whether there were any excursions outside of an appropriate temperature range.

You also have a link from a temperature line within the "**Temperature Log**" to see if the VFC office has determined that an excursion is part of an "Excursion Incident." A link that says "**See Excursion Incident**" will be on each line of the "**Temperature Log**" where the VFC office has tied that excursion to an incident.

NOTE: You must contact the VFC office to report all temperature excursions.

5. EXCURSION INCIDENT LISTDENT LIST

Excursion Incident List

The VFC Program office will contact your office when an incident is created and ask you to provide information related to the incident. When you click "**Excursion Incident List**," you will select the one you are currently addressing if there is more than one incident. This action will bring you to the "**Update Incident Record**" page.

Excursions (In this Incident: 4)	
Change	Detunts Examples Institute Line Control Order Link for Discont 0.0
change	Return to Excursion incident List Go to Order List for PIN:501042

You will see the following details about the incident:

- Provider PIN, site, and unit information
- "Most Recent Readings" recorded for the unit
- (Excursion) From (date and time)
- (Excursion) Thru (date and time)
- Range From (date and time)
- Range Thru (date and time)
- Resolution Date (if there is one): This field should be blank if it is an open incident.
- Latest Update: This shows the date and time that the last update to the incident was documented within Florida SHOTS.
- Accumulated Excursion Time: This adds up the timeframes of all out-of-range temperatures. It removes
 those timeframes where the temperatures were within range. This information is extremely valuable when
 communicating with manufacturers regarding vaccine viability. As you know, some vaccines are still
 viable up to a certain number of hours in which the vaccines were exposed to out-of-range temperatures.
 Having this data in this specific detail that can be provided to manufacturers will assist the VFC Program
 office in determining if the vaccines are still viable.

The other fields on this page will be documented by your office. You would be responsible for:

- Cause (of the incident)
- Action Taken
- Result (of the action taken)

Please remember that the VFC Program will work closely with your office in the event of an incident.

Help Desk

FREE TECHNICAL SUPPORT:

877-888-7468 (SHOT) MONDAY – FRIDAY, 8 A.M. TO 5 P.M. EASTERN

INCLUDING:

- Merging duplicate patient records
- Adding account administrators
- Questions about any Florida SHOTS features
- Unlocking Florida SHOTS accounts
- Requesting Florida SHOTS materials
