Florida SHOTS Training at Your Fingertips

On our Florida SHOTS website (www.flshotsusers.com) we have numerous training resources created just for you—whether you are new to using the system or just need a refresher. Our materials include recorded webinars, step-by step training guides, a weekly blog, data exchange information including updated CVX/CPT codes, and much more. All of our resources are available in English and Spanish, 24/7 and you do not need a Florida SHOTS login to access them!

Did you know that we also have information and tools specifically for parents and guardians? Feel free to refer them to our Parents and Guardians page where they can:

- **Download certification of immunization (DH Form 680)**
- **Learn about required shots for school/child care**
- **Find the nearest county health clinic location**
- **Get answers to FAQs, and more!**

Make sure to bookmark our page, sign up for our blog, and check back frequently so you never miss an important update or announcement. We're here to help you get the most out of Florida SHOTS!

You Said It

STAR USER

It's always nice to know what others who are enrolled in Florida SHOTS have to say about the program. In each issue, we share what some of our users think about the system. This interview features Claudia Tolentino, Administrator of Universal Medical Group of North Miami Beach.

Standing from L to R: Marie Accimeus, Celeste Lescano, Claudia Tolentino, Rodney Rengifo PA.

What do you think is the best feature of Florida SHOTS for your office?

In my opinion the best feature is having all of our patients' vaccines in one statewide database!

What do you think is the best feature of Florida SHOTS for your patients?

It is helpful that we can find information for patients who are new to us or may be missing vaccines. We also like being able to print immunization forms for school from the system.

How have you implemented Florida SHOTS into your daily workflow?

Every day we review vaccine records and print forms for school and daycare.

If another doctor's office were to call and ask you why they should enroll in Florida SHOTS, what would you say?

We would HIGHLY recommend all offices enroll in Florida SHOTS. It helps the patients and your practice.

We're Here for You!

For more information about how you can participate, please call the Florida SHOTS enrollment desk at **(877) 888-SHOT**.

Data Quality Spotlight

DATA UPLOAD

If your office participates in data exchange through your EHR and are interested in 2022 value-based programs such as MIPS, MACRA, etc., be sure to complete a registration in your Florida SHOTS account. Login to Florida SHOTS and click on "**Meaningful Use**" and follow the steps for registering for Stage 3.

Once complete, you will receive a confirmation for your registration. If you met the Public Health objective, an "**Onboarded**" confirmation report is emailed at the beginning of every month.

If you have completed the steps already but have not received the "**Onboarded**" confirmation correspondence, please contact Whitney Hachem at **813-351-0213**.

Upload Tip: Patient ethnicity, as well as other data elements, are reporting requirments per the Department of Health, Emergency Rule 64DER20-43.

Did You Know?

From time to time, you may come across duplicate patient records in Florida SHOTS. Did you know there are a few things you can do to prevent them from ever being created?

Providing full names, up-to-date addresses, and completing as many fields as possible allows Florida SHOTS to cross-reference information and update existing records. Also, remember to click on "**Release Patient Record**" when you're done to prevent locked records and uploading errors.

Tech Tips

"Sometimes parents and guardians lose their DH680 forms. Is there a way to provide additional copies of the form without them having to come back to our office?"

Yes! Healthcare providers can generate and electronically certify DH680 forms in Florida SHOTS and attach a PIN to allow parents/guardians to access the form! The form may be printed from any computer and is legal and valid in the state of Florida for admittance to schools and daycare facilities. You can access our step-by-step guide to create DH680 forms and PINs on www.flshotsusers.com.

Participating Software Providers

These software companies have created data exchange capabilities between Florida SHOTS and their EMR, practice management, or billing software. For a definition of capabilities by certification level, see "Certified Software Providers" at www.flshotsusers.com.

UPLOAD UPDATE

528 MILLION+ SHOTS

As of May 1, 2022, we've processed more than 528 million shots via data upload from over 15,000 participating healthcare providers and multiple insurance organizations. There are also 2,945 real-time live web service healthcare provider connections through 135 EHRs.

Interested in learning more about how your EHR software could be set up to upload shot data to Florida SHOTS? Check out page 3 of this issue to see which software companies are currently participating, or visit **www.flshotsusers.com** for current data upload information.

Something not right?

Incomplete uploads become inaccurate data.

Quality records are what make Florida SHOTS an effective resource for immunization management. But accurate data isn't helpful if it never makes it into the system. Regularly monitoring your data uploads and checking for accuracy ensures your records don't go to waste. Learn how to monitor your uploads through Florida SHOTS data quality training.
